Contents of Volume 65

Volume 65, Number 1, July 8, 1975

AUTHOR INDEX, Volume 65, Number 1	ii
W. SEUBERT and H. H. HAMM. Inactivation and ATP-Dependent Reactivation of Tyrosine Amino-Transferase <i>In Vitro</i> by Membrane Bound Enzymes from Rat Liver and Kidney Cortex	1
W. F. MOO-PENN, D. L. JUE, K. C. BECHTEL, M. H. JOHNSON, E. BEMIS, E. BROSIUS, and R. M. SCHMIDT. Hemoglobin Deaconess A New Deletion Mutant: β 131 (H9) Glutamine Deleted	8
BERNARD L. TRUMPOWER and ASPANDIAR KATKI. Controlled Reduction of Cytochrome <i>b</i> in Succinate-Cytochrome <i>c</i> Reductase Complex by Succinate in the Presence of Ascorbate and Antimycin	16
WILLIAM H. OKAMURA, MANINDRA N. MITRA, DANA A. PROCSAL, and ANTHONY W. NORMAN. Studies on Vitamin D and Its Analogs. VIII. 3-Deoxy-1 α ,25-Dihydroxyvitamin D ₃ , a Potent New Analog of 1 α ,25-(OH) ₂ -D ₃	24
S. P. MARFEY and K. H. TSAI. Cross-Linking of Phospholipids in Human Erythrocyte Membrane	31
FREDERICK J. RYAN, ROBERT BARKER, and N. E. TOLBERT. Inhibition of Ribulose Diphosphate Carboxylase/Oxygenase by Xylitol 1,5-Diphosphate	39
CARLOTA WOLFENSTEIN-TODEL, EDITH MIHAESCO, and BLAS FRANGIONE. Variant of a Human Immunoglobulin: "Alpha Chain Disease" Protein AIT	47
JEFFREY F. MCKELVY. Isolation of a Cyclic AMP Dependent Protein Kinase from Bovine Hypothalamus and Its Interaction with Hypothalamic Substituents	54
M. G. BRATTAIN, C. M. JONES, J. M. PITTMAN, and T. G. PRETLOW II. The Purification of Carcinoembryonic Antigen by Glutaraldehyde Cross-Linked Concanavalin A	63
JOSEPH D. SCHULMAN, STEPHEN I. GOODMAN, JOHN W. MACE, A. D. PATRICK, FRANK TIETZE, and E. J. BUTLER. Glutathionuria: Inborn Error of Metabolism due to Tissue Deficiency of Gamma-Glutamyl Transpeptidase	68
MAX COSTA, CAROL-ANN MANEN, and DIANE H. RUSSELL. <i>In Vivo</i> Activation of cAMP- Dependent Protein Kinase by Aminophylline and 1-Methyl, 3-Isobutyl-xanthine	75
HIROO HORINISHI, SHUICHI HASHIZUME, and MASAHARU SEGUCHI. Occurrence of Arginyl-tRNA: Protein Arginyl Transferase in Baker's Yeast	82
G. SERRERO, R. NEGREL, and G. AILHAUD. Characterization and Partial Purification of an Intestinal Lipase	89
L. TOSI, A. GARNIER, M. HERVE, and M. STEINBUCH. Ceruloplasmin-Anion Interaction a Resonance Raman Spectroscopic Study	100
FRED H. REYNOLDS, Jr. and PAULA M. PITHA. Molecular Weight Study of Human Fibroblast Interferon	107
H. FURTHMAYR, M. TOMITA, and V. T. MARCHESI. Fractionation of the Major Sialoglycopeptides of the Human Red Blood Cell Membrane	113
THOMAS J. FLYNN, D. S. DESHMUKH, G. SUBBA RAO, and RONALD A. PIERINGER. Sulfogalactosyl Diacylglycerol: Occurrence and Biosynthesis of a Novel Lipid in Rat Brain	122
M. MARTINEZ-CARRION, V. SATOR, and M. A. RAFTERY. The Molecular Weight of an Acetylcholine Receptor Isolated from <i>Torpedo californica</i>	129
CARMEN C. C. VIDIGAL, KLAUS ZINNER, NELSON DURÁN, ETELVINO J. H. BECHARA, and GIUSEPPE CILENTO. Generation of Electronic Energy in the Peroxidase Catalyzed Oxidation of Indole-3-Acetic Acid	138
K. C. JOSEPH and J. P. GOCKERMAN. Accumulation of Glycolipids Containing <i>N</i> -Acetylglucosamine in Erythrocyte Stroma of Patients with Congenital Dyserythropoietic Anemia Type II (HEMPAS)	146
MYRON BENUCK and NEVILLE MARKS. Enzymatic Inactivation of Substance P by A Partially Purified Enzyme from Rat Brain	153
L. FERNANDEZ-REVIRA RIO and A. ARROYO-BEGOVICH. Evidence for the Presence of α Amylase in the Cell Membrane of <i>Bacillus amyloliquefaciens</i>	161
JOHN R. DEDMAN and BEN G. HARRIS. <i>Ascaris suum</i> Actin: Properties and Similarities to Rabbit Actin	170

BENJAMIN V. TREADWELL and WILLIAM G. ROBINSON. Isolation of Protein Synthesis Initiation Factor MP from the High-Speed Supernatant Fraction of Wheat Germ	176
IFEANYI J. ARINZE. On the Development of Phosphoenolpyruvate Carboxykinase and Gluconeogenesis in Guinea Pig Liver	184
T. H. KUO, C. T. OU, and T. T. TCHEN. The Effect of Calcium on the Stimulation of Corticosterone Biosynthesis by Dibutyryl-c-AMP in Cultures of ATCC Cell Line Y-1	190
M. J. PRINGLE and P. R. ADAMS. Modification by Procaine of Membrane ANS Fluorescence Changes Induced by Electrical Stimulation of Nerve and Muscle Fibres	196
MELVYN S. SOLOFF. Uterine Receptor for Oxytocin: Effects of Estrogen	205
PETER J. HUDSON, D. BRUCE KEECH, and JOHN C. WALLACE. Pyruvate Carboxylase: Affinity Labelling of the Pyruvate Binding Site	213
R. BAUMANN and E. A. HALLER. Cat Haemoglobins A and B: Differences in the Interaction with CL^- , Phosphate and CO_2	220
J. M. L. MEE, C. C. BROOKS, and K. H. YANAGIHARA. The Course of Photo-oxidation of Menadione	228
GARY L. NELSESTUEN, MARGARET BRODERIUS, THOMAS H. ZYTKOVICZ, and JAMES BRYANT HOWARD. On the Role of γ -Carboxyglutamic Acid in Calcium and Phospholipid Binding	233
FLOYD ABBOTT, DENNIS W. DARNALL, and EDWARD R. BIRNBAUM. The Location of the Lanthanide Ion Binding Site on Bovine Trypsin	241
JAN S. TKACZ and J. OLIVER LAMPEN. Tunicamycin Inhibition of Polyisoprenyl N-Acetylglucosaminyl Pyrophosphate Formation in Calf-Liver Microsomes	248
LINDA C. HAYES, FRED V. PLAPP, LOWELL L. TILZER, and MASAHIRO CHIGA. Transfer RNA Content and Dissociability of Mouse Liver Monosomes Produced by Histidinol	258
R. A. WALTERS and C. E. HILDEBRAND. Evidence That X-Irradiation Inhibits DNA Replication Initiation in Chinese Hamster Cells	265
RICHARD A. KOMOROSKI, IAN R. PEAT, and GEORGE C. LEVY. High Field Carbon-13 NMR Spectroscopy. Conformational Mobility in Gramicidin S and Frequency Dependence of ^{13}C Spin-Lattice Relaxation Times	272
R. FARBSZEWSKI and W. RZECZYCKI. The Digestion of Basic Proteins by Extract of Guerin Tumor Lysosomes	280
JIRO ISHIYAMA. Isolation of Cyclic 3',5'-Pyrimidine Mononucleotides from Bacterial Culture Fluids	286
JEREMIAH J. MORRISSEY, HERBERT WEISSBACH, and NATHAN BROTH. The Identification and Characterization of Proteins Similar to L7, L12 in Ribosome-Free Extracts of <i>Escherichia coli</i>	293
V. N. FINELLI, D. S. KLAUDER, M. A. KARAFFA, and H. G. PETERING. Interaction of Zinc and Lead on δ -Aminolevulinic Dehydratase	303
DAVID G. PRITCHARD, WILLIAM C. SCHNUTE, JR., and CHARLES W. TODD. Mass Spectrometry of Fluorescamine Derivatives of Amino Acids and Peptides	312
MARTIN SALDEN, TON BISSELING, ANTON BERNIS, and HANS BLOEMENDAL. Requirement of a Dialyzable Component from Crude Initiation Factors for the Translation of Viral and Eukaryotic Messenger RNA	317
DOUGLAS F. MARTIN and G. NIGEL GODSON. Identification of a ϕ X174 Coded Protein Involved in the Shut-Off of Host DNA Replication	323
F. M. MIESOWICZ and K. E. BLOCH. Acetylene-Allene Acyl Thioester Isomerase from Hog Liver	331
J. BROUWER and R. J. PLANTA. Protein Composition of Ribosomes in DNA-Membrane Complexes from <i>Bacillus licheniformis</i>	336
BARRY D. McLENNAN. Enzymatic Demodification of Transfer RNA Species Containing N^6 -(Δ^2 -Isopentenyl) Adenosine	345
T. KOMIYANA, T. AOYAGI, T. TAKEUCHI, and H. UMEZAWA. Inhibitory Effects of Phosphoramidon on Neutral Metalloendopeptidases and its Application on Affinity Chromatography	352
R. HORGAN. A New Cytokinin Metabolite	358
G. GERISCH and U. WICK. Intracellular Oscillations and Release of Cyclic AMP from <i>Dictyostelium</i> Cells	364

JAMES BEARDEN, JR. and CHARLES W. HAIDLE. Stimulation of Bleomycin-Induced Fragmentation of DNA by Intercalating Agents	371
R. J. EISENBERG and K. LILLMARS. A Method for Gentle Lysis of <i>Streptococcus sanguis</i> and <i>Streptococcus mutans</i>	378
R. E. CATALÁN, M. P. CASTILLÓN, and A. M. MUNICIO. Adenosine 3',5'-Monophosphate Phosphodiesterase Activity during Development of the Insect <i>Ceratitis capitata</i>	385
J.-G. LEHOUX and J. C. FOREST. Cytochrome P-450 and 18-Oxygenase System from Beef Adrenocortical Mitochondria—Inhibitory Effect of Puromycin	392
HARALD HOENSCH, C. H. WOO, and RUDI SCHMID. Cytochrome P-450 and Drug Metabolism in Intestinal Villous and Crypt Cells of Rats: Effect of Dietary Iron	399
RICHARD MASKIEWICZ, THOMAS C. BRUCE, and ROBERT G. BARTSCH. The Acid-Base Properties and Kinetics of Dissolution of the Fe ₄ S ₄ Cores of Chromatium Ferredoxin and High Potential Iron Protein	407
VICTOR S. FANG, H. W. CHO, and HERBERT Y. MELTZER. Labeling of Creatine Phosphokinase without Loss of Enzyme Activity	413
G. W. KIDDER and LINDA L. NOLAN. Enzymatic Synthesis of Labeled Carbamyl-Aspartic Acid	420
G. C. SEN, B. LEBLEU, G. E. BROWN, M. A. REBELLO, Y. FURUICHI, M. MORGAN, A. J. SHATKIN, and P. LENGUEL. Inhibition of Reovirus Messenger RNA Methylation in Extracts of Interferon-Treated Ehrlich Ascites Tumor Cells	427
N. J. JACOBS and J. M. JACOBS. Fumarate as Alternate Electron Acceptor for the Late Steps of Anaerobic Heme Synthesis in <i>Escherichia coli</i>	435
AUDREY STEVENS. Inhibition of DNA-Dependent RNA Polymerase of <i>E. coli</i> by Phospholipids	442
ERRATA	
Volume 63, Number 1, March 3, 1975: M. Talpaert, F. Campagnari, and L. Clerici, "Lipiamycin: an Antibiotic Inhibiting Nucleic Acid Polymerases" pp. 328-334	447

AUTHOR INDEX, VOLUME 64	1466

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) 115, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote, rather than in the text.** Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [³²P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1974) 160, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Do not attempt to insert figures, figure legends or tables into the text. This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chatteraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) *Cyclic AMP*, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
